Aneurinibacillus migulanus has biocontrol activities against fungal, fungus-like, and bacterial plant pathogens with different levels of efficacy depending on the target pathogens. Here, we report the high-quality draft genome sequence of *A. migulanus* NCTC 7096.

The genome of *NCTC 7096* has been deposited at GenBank under accession no. JYBO00000000. This paper describes the first version of the genome.
